

# VNCcontacts

Enterprise contacts & address management

# VNC – Virtual Network Consult AG

VNC is the leading vendor of an integrated stack of collaboration and communication products for organisations who prefer to go with software that is based on open standards: VNClagoon.

## About us

VNC – Virtual Network Consult AG, based in Switzerland, Germany and India – is a leading developer of open source based enterprise applications and positions itself as an open and secure alternative to the established software giants.

With the VNClagoon software stack, VNC, with its global open source developer community, have created an integrated product suite for Enterprise, SME, Governments and other Organisations, characterised by high security, state-of-the-art technology and low TCO.

The VNClagoon software stack consists of a variety of integrated products for seamless communication and collaboration, such as messaging, video conferencing, email, groupware, task & project management, file sharing, channels, and more. VNClagoon is a leading alternative to closed source and / or SaaS-only applications like Microsoft Teams, Zoom, WhatsApp and others.

The impressive list of VNC customers, who are using one or several of the VNClagoon components and products, demonstrates the solidity of the VNC concept: the future of modern software will no longer rely on closed source!

# VNCcontacts

Enterprise contacts and address management.

VNCcontacts was created to offer an easy-to-use yet powerful contact management which allows fast access to all interactions with installed VNC products like VNCtalk or VNCmail.

Why waste time with scrolling through your contacts on your phone, when you can have a fully equipped contact management? VNCcontacts helps you to manage all your contacts efficiently, easily and extends your communication options. You can call or text your contacts directly and you can also use all options from your VNClagoon products straight from the contact details, e.g. chat, video or voice calls.

With its clear design VNCcontacts makes it really easy to manage as many contacts as you need. And because it's also available as an app, you can access your contacts wherever you go.

## Advanced Contact Management For Enterprise Users

The advantage of the VNCcontacts backend is that the contacts can be fed from a variety of sources:

the contacts / emailed contacts of VNCmail; various directory services (OpenLDAP, databases) per your choice or VNCdirectory, where you can manage all users and access permissions in one place.

Numerous contact details:

Create contacts with name, title, contact information for private and business purposes, with a picture and various email addresses. Extend the contact details with messenger IDs or postal addresses, website, additional notes and birthday.

### Contact Management

All contact details in one place, straightforward to edit and manage, always available.

### Private Contacts

Share your company contact lists with your team, while keeping your private contacts confidential.

### Folders & Favorites

Manage distribution lists and work groups thanks to the seamless integration with VNCdirectory.

## What are the core advantages of VNCIagoon?

VNCIagoon is an unrivaled unified and secure suite of communication and collaboration solutions and offers numerous benefits:

- flexible, modular and integrated applications for seamless workflows and communications
- state-of-the-art user interfaces
- low TCO
- modular and scalable
- privacy compliant, transparent and secure hosting of your choice
- granular rights/role management thanks to VNCdirectory

“VNC challenges the software giants that are oppressing the market with their expensive, inflexible and uninventive proprietary solutions. It’s time for open-source applications to finally replace them. We use VNC’s collaboration tools ourselves, including VNCtalk and, most recently, VNCchannels. The tools have made the transition to working from home extremely easy. The comprehensive VNCIagoon product suite is a real highlight in terms of functionality and operation.”

Alain Blaes, Managing Director of PR-COM Beratungsgesellschaft für strategische Kommunikation mbH

“The federal state church intranet should strengthen communication and cooperation within the state church. The basic aim is to provide all full-time employees and volunteers of the regional church with access to an innovative, modern and unified communication and collaboration infrastructure. The VNCIagoon products are particularly well suited for this, because they allow us as a state church – in addition to the many functionalities provided – the possibility of customization options to individual needs within our church. “

Tabea Langguth, Project Manager Landeskirchenweites Intranet, EKBO

“VNC and DFB GmbH have been working together intensively for many years. We want to continue and expand this. The DFBnet mailbox developed and implemented by VNC has enormously accelerated and simplified our internal communication. With this, we see ourselves well prepared for future requirements.”

Steffen Iredi, authorized signatory at DFB GmbH and responsible Director Technology & Operations

“My team and I are very thankful for being able to count on the professional and sophisticated VNC team. VNC has supported us with a series of important projects, always exceeding our high expectations.”

Marius Hjelset, Project Head Hosted Services, Vodafone Group
