

VNCsafe

Private and Secure File Transfer – on any device,
any OS and stored on the server of your choice

VNC – Virtual Network Consult AG

VNC is the leading vendor of an integrated stack of collaboration and communication products for organisations who prefer to go with software that is based on open standards: VNClagoon.

About us

VNC – Virtual Network Consult AG, based in Switzerland, Germany and India – is a leading developer of open source based enterprise applications and positions itself as an open and secure alternative to the established software giants.

With the VNClagoon software stack, VNC, with its global open source developer community, have created an integrated product suite for Enterprise, SME, Governments and other Organisations, characterised by high security, state-of-the-art technology and low TCO.

The VNClagoon software stack consists of a variety of integrated products for seamless communication and collaboration, such as messaging, video conferencing, email, groupware, task & project management, file sharing, channels, and more. VNClagoon is a leading alternative to closed source and / or SaaS-only applications like Microsoft Teams, Zoom, WhatsApp and others.

The impressive list of VNC customers, who are using one or several of the VNClagoon components and products, demonstrates the solidity of the VNC concept: the future of modern software will no longer rely on closed source!

VNCsafe

Private and Secure File Transfer – on any device,
any OS and stored on the server of your choice

Store your files, folders, contacts, image galleries, videos and more on a server of your choice. Access that folder from your mobile device, your desktop, or a web browser. Access your data wherever you are, when you need it.

VNCsafe is integrated within VNCmail, so you have your files available directly within your groupware and can save, store, share them right there. Compose an email and attach a file from VNCsafe with just one click.

You don't have to download large files – this is done by VNCsafe on the server. Therefore, bandwidth is no longer a problem when it comes to large files!

Drag & Drop a file to any folder in VNCsafe manually or rules based.

Secure File Sync & Share

VNCsafe offers File Sync & Share in a secure manner with plenty of intelligent features.

Access your files from any device:

no matter which device you are using – Desktop, Laptop, Tablet or a Smartphone – your data travel with you!

Organize your most crucial or important data with the help of “favorites” for fast retrieval.

Tag your content to get organized – even when your data store grows.

Share your folders and files securely with internal and external users via e.g. password protection and limited availability.

Universal File Access

Sync your data bidirectionally with other tools. Your files are synced to several file stores and applications.

What is VNClagoon?

VNClagoon is an integrated suite of enterprise applications offering a secure alternative to the established software giants.

Now it is possible to collaborate with anyone, from anywhere, on any device, under the strictest privacy standards available while retaining the right to digital sovereignty.

“VNC challenges the software giants that are oppressing the market with their expensive, inflexible and uninventive proprietary solutions. It’s time for open-source applications to finally replace them. We use VNC’s collaboration tools ourselves, including VNCtalk and, most recently, VNCchannels. The tools have made the transition to working from home extremely easy. The comprehensive VNCIagoon product suite is a real highlight in terms of functionality and operation.”

Alain Blaes, Managing Director of PR-COM Beratungsgesellschaft für strategische Kommunikation mbH

“The federal state church intranet should strengthen communication and cooperation within the state church. The basic aim is to provide all full-time employees and volunteers of the regional church with access to an innovative, modern and unified communication and collaboration infrastructure. The VNCIagoon products are particularly well suited for this, because they allow us as a state church – in addition to the many functionalities provided – the possibility of customization options to individual needs within our church. “

Tabea Langguth, Project Manager Landeskirchenweites Intranet, EKBO

“VNC and DFB GmbH have been working together intensively for many years. We want to continue and expand this. The DFBnet mailbox developed and implemented by VNC has enormously accelerated and simplified our internal communication. With this, we see ourselves well prepared for future requirements.”

Steffen Iredi, authorized signatory at DFB GmbH and responsible Director Technology & Operations

“My team and I are very thankful for being able to count on the professional and sophisticated VNC team. VNC has supported us with a series of important projects, always exceeding our high expectations.”

Marius Hjelset, Project Head Hosted Services, Vodafone Group
